
- Number of read-out channels/plane = 512
- Read-out pitch = 50 mm
- Active detector area/plane = 25.6 mm * 58 mm
- 1-512: read-out direction for the given plane
- X-planes measure horizontal coordinate (strips are vertical)
- Y-planes measure vertical coordinate (strips are horizontal)
- Parallel plate chambers (2 planes in "OR") - 2 cm * 2cm
